

CampusNova University ? Faculty Operations & Substitution Guidelines

1. Faculty Weekly Teaching Load Limits

Full-time professors and associate faculty members must maintain a standard weekly teaching commitment of 16 to 20 instructional hours across Lecture Hall (LH) and Lab sessions. In no circumstance shall a faculty member be scheduled for more than 4 consecutive lecture hours in a single day.

2. Faculty Absence Notification & SLAs

Faculty members anticipating absence must submit a leave request at least 24 hours in advance. In emergency medical situations, immediate notification must be sent to the Dean of Academics prior to 08:00 AM on the day of absence.

3. Predictive Substitute Allocation Protocol

When a faculty member is marked absent, CampusNova PredictiveAllocator evaluates available faculty based on:

- Subject expertise compatibility score (minimum 0.70 threshold)
- Real-time availability during the affected timetable period
- Historical substitution load balancing
- Departmental proximity (CSE, ECE, Basic Sciences)

4. Room Capacities and Laboratory Constraints

Classes assigned to Lecture Halls (LH-101 capacity 60, LH-102 capacity 60) must not exceed physical seat allocations. Computing Lab (LAB1) and Hardware Lab (LAB2) require specialized faculty oversight and assistant instructors for batch sizes over 30 students.
